

Dataset-centric: real values, 4 datasets (rows) x 4 focus genes (columns)

Same underlying observations as Figures B1-B4, reorganized to compare across datasets within one row at a time.
GSE118713/GSE111151 = resistance models; GSE240112 = recurrence-associated unpaired human tumours; GSE245601 = acute 12h, patient-paired.
