

GSE118713: Estrogen response (early)

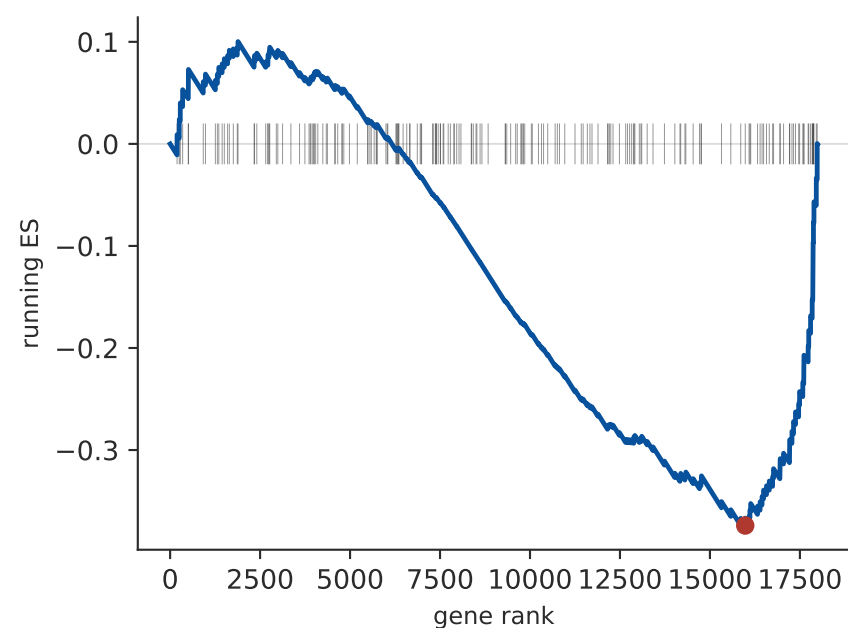

GSE245601 (acute): Estrogen response (early)

GSE111151: EMT

GSE245601 (acute): EMT

Real running-sum GSEA enrichment-score curves, reconstructed from the already-frozen ranked gene list + Hallmark gene-set membership (same statistic the frozen NES/FDR already summarize -- see DATA_FOR_VISUALIZATION_AUDIT.md). Tick marks = gene-set members' rank positions. Red dot = peak deviation (the enrichment score).
