

ANALYSIS PLAN AND CANDIDATE LIST FIXED HERE

thresholds dated before any result existed · list fixed before
the external datasets were opened

PRE-SPECIFIED

Genome-wide CRISPR knockout screen
19,103 genes · published data,
reanalysed

13 hits pass the pre-specified gate
false discovery rate < 0.10, sensitising
direction

Four candidates carried forward
USP34, VEZF1 by the frozen rule
KDM1A, TLK2 added after external audit

RUN AFTERWARDS, AGAINST THE FIXED LIST

Four transcriptomic datasets
never used to pick the candidates

**Do the genes
change?**
